Table of Contents

Version Number	Description of Change	Author	Date
1.0	Initial Creation of Document	Michael Salgo	04/07/2018
1.1	Revised Document and added Privacy Policy	Victoria Guadagno	04/08/2018
1.2.	Revised Document for Formatting and content	Michael Salgo	04/09/2018
2.0	Revised document to reflect Phase II additions and updates	Kelli Corey	08/03/2018
2.1	Revised document according to Phase II	Adeola Odusola	08/06/2018

Introduction

The purpose of this document is to document areas of the NASA EVA Gamification extension that allow for admin configuration. Additionally, information regarding privacy policy and terms of use are presented for clarity as to what information is being used and why.

Configuration Instruction

In MediaWiki, and by proxy, the extensions built on its platform, the design expected by developers is to have all configurable values stored in configuration files and not stored within a database. This allows for easier and consistent administration, especially from a command line perspective.

There are presently three separate places where we are storing configurable values within the NASA_EVA_Gamification extension.

i18n\en.json

The first configurable file is the "en.json" file within the "i18n" localization folder. In addition to being used for localization for text being displayed on the screen, such as the title of the User Gamification Profile page, an admin is able to specify what the name of each rank is called, how many ranks there are, what the name for badges should be (in both singular and plural form), as well as naming the badges earned. This is important to keep in the localization file because these values can change from one language to the next.

The other items listed in this "en.json" file are strictly for display on the User Gamification Profile page (the "SpecialUserGamificationProfile.php" file within the "specials" folders). The "usergamificationprofile" value is used in the link that is displayed on the Special Pages page within MediaWiki. It is important that each item listed in the "en.json" file has matching representation in the "qqq.json" file which is used to store the description of each item used.

modules\ext.gamification.foo.css

The second configurable file is the "ext.gamification.foo.css" file within the "modules" script folder. This folder is meant to hold JavaScript and CSS files that are pertinent to the extension. There is no purpose for the "foo" that is seen in the file names other than a default name provided by MediaWiki documentation.

extension.json

The third configurable file is the "extension.json" file located in the root folder of the NASA_EVA_Gamification extension. The primary purpose of this file is to store information needed by MediaWiki such as autoloading classes (another option instead of autoload.php), where to find the script files, which MediaWiki hooks are being called, the localization files directory, storing global variables through the config section (another option instead of local settings.php), etc. Note that the MediaWiki's LocalSettings.php file is a preferred option to storing global variables due to syntax convenience as it is already a php file.

Images

Images in use in the website for this extension are stored within the "images" folder. For the purpose of development and testing, generic bronze, silver, gold, and platinum badge images were used.

File Rules

You can customize many files within the NASA_EVA_Gamification extension, but some files are part of MediaWiki and were not altered during our semester's work on the project. These files have a MediaWiki use and may need to be updated for their intended purpose; check MediaWiki syntax and code structure for further information.

These files are:

- composer.json
- Gruntfile.js
- package.json
- phpcs.xml

Privacy Policy

This privacy policy has been compiled to better serve those who are concerned with how their 'Personally Identifiable Information' (PII) is being used online. PII, as described in US privacy law and information security, is information that can be used on its own or with other information to identify, contact, or locate a single person, or to identify an individual in context. Please read our privacy policy carefully to get a clear understanding of how we collect, use, protect or otherwise handle your Personally Identifiable Information in accordance with our website.

What personal information do we collect from the people that visit our blog, website or app?

We do not collect information from visitors of our site.

Do we use 'cookies'?

We do not use cookies for tracking purposes

Third-party disclosure

We do not sell, trade, or otherwise transfer to outside parties your Personally Identifiable Information.

Third-party links

We do not include or offer third-party products or services on our website.

COPPA (Children Online Privacy Protection Act)

When it comes to the collection of personal information from children under the age of 13 years old, the Children's Online Privacy Protection Act (COPPA) puts parents in control. The Federal Trade Commission, United States' consumer protection agency, enforces the COPPA Rule, which spells out what operators of websites and online services must do to protect children's privacy and safety online.

We do not specifically market to children under the age of 13 years old.

Please refer to MediaWiki's privacy policy (https://wikimediafoundation.org/wiki/Privacy_policy) for details on how they collect and use your personal information. The NASA EVA Gamification extension does not track or use any personal information. It only verifies that the information exists.
